INTRODUCTION

I'm a Colorado native with a passion for computer systems, computer science, software engineering and all things STEM. I have experience with full stack web application development, participating in agile software engineering, and sprint planning. I have a strong interest in computer architecture and learning how to work with low-level machine languages like Assembly and C. My whole life I've had an interest in computers and I built my first personal machine when I was 14. Outside of work I like computer gaming, making minecraft mods, snowboarding, biking, and fitness.

EXPERIENCE

FieldSync, Fort Collins — Intern JUNE 2025 - PRESENT

Software Development internship tasked with adding features to the FieldSync web application both frontend and backend development, this included creating database migrations, creating API endpoints and services for new database objects, building frontend components, and making them work together in an efficient, scalable way that implements the business requirements. Real world work experience attending engineering meetings, giving stand ups, attending sprint planning working to deliver features in two week sprints.

- Nest.js backend REST API framework (TypeScript)
- Postgres SQL database/migrations (TypeORM)
- React frontend (TypeScript)
- Tableplus - Database debugging
- Postman - API debugging
- Docker containerized application

FieldSync, Fort Collins — Intern JUNE 2024 - AUGUST 2024

Software Development internship tasked with development of a python application (GUI) to ingest photo datasets, parse photo metadata (latitude, longitude, altitude, roll, pitch, yaw, etc.) to compute sampling distance and assess adjacent photo overlap, and photo quality for digital twin creation. Data aggregation and processing. Data visualization.

- Python - "customtkinter" GUI
- Loading thousands of photos from disk
- Data parsing photo EXIF metadata
- Computing haversine distances
- Computing sampling distance from centroid
- Evaluating photo quality using BRISQE
- CSV data export
- DevOps (Github actions) for building Windows and Mac executables

Subway, Denver— Sandwich Artist, Cook, Cashier AUGUST 2022 - AUGUST 2023

Delivered excellent customer service and managed closing responsibilities, other employees, including food preparation and cash handling.

Saucy Bombay, Denver — Line Worker JUNE 2022 - AUGUST 2022

Provided positive customer service experience and maintained efficiency in a fast-paced food service environment.

SKILLS

Python
Java
TypeScript
React
Databases
Github/Git
Docker
AWS
Critical Thinking
Problem Solving

LANGUAGES

English

EDUCATION

Colorado State University, Fort Collins — Computer Science Bachelor's Degree

AUGUST 2023 -
CURRENT

EXPECTED
COMPLETION - MAY
2027

PROJECTS

Certification: Android Basics Nanodegree by Google — Udacity
